

Placing Your Custom Banner Images Into The Blueball Cubicle v8 Sandvox 2 Designs

The Blueball Cubicle v8 designs allow you to easily add your own banner image into your page layout in Sandvox 2. The custom banner image area in this design layout is placed into the “page-top” div area at the top of the page under the title and tagline text lines, and the logo image above the nav menu.

We provide 2 layered custom banner Photoshop image files with this design to help create your own custom banner images with. One is for the Cubicle Narrow designs and one file is for the Cubicle Wide designs. You can open up the banner image file you want to use for your site in the image editor of your choice, and use it (the image) to help create your own custom banner image(s) with.

Your custom banner image must be sized exactly as noted below!

Cubicle Narrow banner image size - 782px wide by 200px tall

Cubicle Wide banner image size - 982px wide by 200px tall

We recommend saving your custom banner image as a 72 ppi resolution RGB (sRGB is fine too) jpg image file with a 50% to 80% quality setting using the “save for web” function/feature (if available) in your image editor. **Make sure there are no spaces in your image file name!**

We also provide preset custom banner images for you to use too!

To save time and help Blueball Cubicle Sandvox 2 users out, we have included 20 preset custom banner images for each Cubicle design width (40 total images) that you can use for your custom banner image on your Sandvox 2 site if you want to.

How to add your custom banner image to your Sandvox 2 site.

After creating your new custom banner image using the image editing program of your choice (or just use one of the preset custom banner images supplied with your Blueball Cubicle designs bundle download), open up the Inspector window in Sandvox 2 and click on the far left “Site” icon image at the top of the window. Then click on the “Appearance” tab and in the window that appears go to the Banner section and select the “Image Fill” option. Last, click on the “Choose” button and select your custom banner image you want to add to your site. NOTE that the image must be the size specified above or your banner image will not display correctly within the Cubicle design layout.
