

## Placing Your Custom Banner Images Into The Blueball Pro Tabs v6.0 Sandvox 2 Designs

The Blueball Pro Tabs designs allow you to easily add your own banner image into your page layout in Sandvox 2. The custom banner image area in this design layout is placed into the "title" div area near the top of the page under the title, text, slogan text and logo image, and above the tabbed nav menu, content area, and right sidebar area.

**Your custom banner image must be sized exactly as noted below!**

**Pro Tabs banner image size - 720px wide by 220px tall**

**Pro Tabs Wide banner image size - 920px wide by 220px tall**

We recommend saving your custom banner image as a 72 ppi resolution RGB (sRGB is fine too) jpg image file with a 50% to 80% quality setting using the "save for web" function/feature (if available) in your image editor. **Make sure there are no spaces or special characters in your custom banner image file name!**

### **How to add your custom banner image into your Sandvox 2 site.**

After creating your new custom banner image using the image editing program of your choice, open up the Inspector window in Sandvox 2 and click on the far left "Site" icon image at the top of the window.

Then click on the "Appearance" tab and in the window that appears go to the Banner section and select the "Image Fill" option. Last, click on the "Choose" button and select your custom banner image you want to add to your site. NOTE that the image must be the size specified above or your banner image will not display correctly within the Pro Tabs design layout.

Now refresh your page view in the Sandvox 2 work window (Command + R), and your new custom banner image will appear in position on your site pages.

## **Help Us Improve Our Sandvox Designs For Sandvox Users! Comments, Feedback, and Suggestions Are Welcome!**

What do you think of our Sandvox Designs? What would you like to see? We need you to let us know what we can do to make your experience using Sandvox with our Sandvox Designs better for you.
