

## Blueball Pro Tabs v6.0 Sandvox 2 Designs

### Version Release Notes

#### Version 6.0 - Released 04-03-12

##### **Major update made to the following elements in the Pro Tabs designs layout:**

- Update all existing Pro Tabs designs for Sandvox 2. Included new Sandvox 2 features.
- Added in new Pro Tabs Dark and Pro Tabs Dark Wide designs to bundle.
- Added in new hierarchical nav menu sub levels for Sandvox 2.
- New custom banner image sizes: 720px wide by 220px tall, 920px wide by 220px tall.
- Nav menu tabs now created using CSS3.
- Banner image now appears behind nav menu tabs which display over bottom of banner.
- Updated all Pro Tabs designs plist files to make them compatible with Sandvox 2. This may require you to reapply the Pro Tabs design you have been using again to your site file the first time you open it up in Sandvox 2.
- Updated 3 Blueball Pro Tabs readme pdf files.

#### Version 5.0 - Released 01-05-09

- Fixed display issue with IE6 when IE6 was not in full screen mode that caused page contents to be off center. Page contents now display correctly when IE6 is not in full screen mode.
- Added in several new css adjustments to the main.css file: Added in bottom margin of 8px to content area paragraphs. Added in 6px bottom margin to all pagelet paragraphs. Removed duplicate listing of Callout divs in page contents group. Adjusted Callout width to 210px to match sidebar Pagelet width. Removed border from pagelet and callout images. Adjusted positioning of callout and pagelet images.
- Added in new image resizing to design's info.plist file. All images are now resized through the info.plist file in the design over riding Sandvox's default image rescaling.
- Added in new placeholder image.

## **Version 4.0 - Released 09-28-08**

- Updated both design width versions for Sandvox 1.5's new features and functions
- Updated main.css file in both designs extensively. Completely recoded.
- Added in 9 new color schemes for each design width.
- Pro Tabs bundle now includes 9 color designs for each page width giving you a total of 18 individual Blueball Pro Tabs designs to work with.
- Created and added in all new designer background image graphics.
- Added in blockquote css styling
- Added in new nav menu images and styling for current page menu status. New colored tab with white name now indicates current page status instead of old white background in previous Pro Tabs design version.
- Added in new custom banner image swap functionality
- Pro Tabs now loads faster and displays flawlessly in IE6, IE7, Firefox and Safari.
- Updated 2 Readme files for each design, added in new Banner Images readme file.

## **Version 3.0 - Released 06-30-07**

- Fixed sidebar pagelet border where images and content would be cropped incorrectly. Side bar pagelet now displays correctly with border on or off.
- Adjusted top and bottom padding on article h3 headline so that on collection page using images, vertical spacing displays correctly.

## **Version 2.0 - Released 04-09-07**

- Fixed page content margin offset when page was viewed in IE6. Layout now displays correctly when pages are viewed in IE6.
- Removed article image default left alignment so Sandvox user can now align image left, right, or centered.

## Version 1.0 - Released 03-27-07
