A Blueball Design Responsive Sandvox Design

Blueball Slider Design Changelog v2.0.

This readme file lists the changes made to each new version release of the Blueball Slider responsive Sandvox design as they are released to help keep you informed of the latest updates and changes made to Blueball Slider.

Blueball Slider version 2.0 - Released 06-05-17..

- Added new Blueball Slider Midnight color design. Features dark background color with blue highlight color scheme.

- Added new Blueball Slider Dark color design. Features black background color with medium gray highlight monochromatic color scheme.

Blueball Slider version 1.5 - Released 05-24-17.

A critical update ALL Blueball Slider users need to make!

This is a VERY important update for every Blueball Slider user to make that fixes the display of the slideshow on mobile devices. Install the Slider v1.5 update and restart Sandvox. PLEASE NOTE the javascript code changes made to simplify the code you need to use. **With v1.5, you only have to copy and paste code into one location in the code injection window.**

- Javascript code used in Blueball Slider design completely rewritten.

- Slideshow now displays and works correctly on mobile layout on tablets and smartphones.

- Simplified code addition. Only need to paste javascript code into one location in SiteCode Injection or Page Code Injection window.

- You can now control/customize the slide transition and delay times.

- Minor updates to Slider design main.css file.

Note that you will have to adjust the code you had previously pasted into either Site or Page Code Injection windows to the new single location required in Blueball Slider v1.5, and then do a "Republish All" one time in order for your Blueball Slider design site to be updated.

Blueball Slider version 1.0 - Released 04-13-17.

- Initial Blueball Slider release
